

ADITYA GAITONDE

Senior Engineering Manager | Cloud Infrastructure & Distributed Systems

Seattle, WA • adityagaitonde@gmail.com • +1-607-280-3003 • [linkedin.com/in/aditya-gaitonde](https://www.linkedin.com/in/aditya-gaitonde)

PROFESSIONAL SUMMARY

Engineering leader with 12+ years building and scaling large-scale distributed systems and cloud infrastructure, including 4+ years managing high-performing teams at Oracle Cloud Infrastructure (OCI). Proven record of delivering fully managed, highly available platform services — real-time data streaming, Kubernetes and cloud-native infrastructure, and SaaS control planes — at global, multi-tenant scale. Early career spans AI/ML and natural-language-processing systems at IBM Watson. Strong at hiring, mentoring, and growing teams while driving architecture, reliability, and operational excellence for mission-critical services.

CORE COMPETENCIES

Engineering Leadership: People management • Hiring & technical interviewing • Mentoring & team growth • Cross-functional collaboration • Technical strategy & roadmap • Delivery & on-call operations

Domains: Distributed systems • Cloud infrastructure • Real-time data streaming • Kubernetes & cloud-native platforms • SaaS control / data planes • Multi-tenant, highly available services • AI/ML & NLP

Technologies: Java, C++, Python, SQL • Apache Kafka • Kubernetes • Spring, Hibernate • Netflix OSS • Oracle Cloud Infrastructure (OCI)

PROFESSIONAL EXPERIENCE

Oracle — Oracle Cloud Infrastructure (OCI) Seattle, WA / Redwood Shores, CA

Senior Engineering Manager & Service Owner

Aug 2024 – Present

Seattle, WA • Hybrid

- Lead a distributed US-based engineering organization of up to 20 engineers and 2 managers across the multiple platform engineering teams such as, Pegasus, API Catalogue, and Oracle Managed Kubernetes (OMK) platforms — owning service strategy, roadmap execution, operations, and customer adoption.
- Delivered General Availability (GA) of multiple web services across 100+ OCI regions and 35+ realms and stabilized the services with 99.99% availability SLA.
- Drove customer adoption across 40+ OCI services improving onboarding experience and ecosystem integration for delivered GA services
- Built AI-driven engineering workflows — a Pegasus Service Generation AI-powered customer-outreach tooling for OMK onboarding — and applied AI and automation to reporting, estimation, and planning to significantly improve team productivity.
- Delivered executive-level reporting on operational health, KPIs, and roadmap progress, presenting technical strategy and platform vision to VP-level leadership.
- Recognized as a Key Oracle Interviewer (Gold Badge); conducted 190+ interviews across campus, datacenter, and engineering-blitz hiring, and mentored engineers toward Key Interviewer certification.

Software Development Manager

Nov 2021 – Aug 2024

Seattle, WA • Hybrid

- Managed a 12-engineer Data Plane team for the OCI Streaming Service within the Messaging Platform, delivering an append-only log service that provides a fully managed, scalable, and durable solution for ingesting and consuming high-volume data streams in real time.
- Owned end-to-end delivery, reliability, and on-call operations for a high-throughput streaming platform serving enterprise workloads.

Principal Member of Technical Staff

Jan 2020 – Nov 2021

Redwood Shores, CA

- Tech lead for the Platform team in the SaaS OCI Cloud Platform, building a platform-based Control Plane for onboarding SaaS services into OCI.
- Designed and improved the onboarding process, scaling it to support 40+ SaaS services within a single year.

Senior Member of Technical Staff

Oct 2016 – Jan 2020

Redwood Shores, CA

- Re-architected promotion-account provisioning to create critical entities first (tenancy, cloud account) with lazy creation of remaining entities — reducing latency from ~10 minutes to a p99 of 30 seconds while targeting 10,000 accounts/hour; featured at Oracle OpenWorld 2019.
- Member of the founding team onboarding Oracle SaaS offerings (HCM, ERP, CRM, SCM) into OCI across the UK and US, including UCM onboarding for Exadata and multiple Cloud@Customer projects.

IBM — IBM Watson Littleton, MA

Staff Software Engineer, IBM Watson

Jul 2014 – Sep 2016

- Built and maintained indices, dictionaries, and annotations consumed by Core Watson at runtime within the ingestion pipeline.
- Developed a scalable Document Conversion Service on the Netflix OSS stack in the IBM Watson Developer Cloud, exposing APIs to convert Word, PDF, and HTML into formats usable by downstream Watson services such as Retrieve and Rank.
- Contributed to the NLP pipeline for Watson Health, supporting clinical/medical use cases for a Boston-area health institution.

Deloitte Mumbai, India

Business Technology Analyst

Jun 2011 – Jul 2013

- Delivered and maintained web applications for enterprise and US public-sector clients using J2SE, Struts 2, Hibernate, Spring, JSF, AJAX, JavaScript, and HTML.
- Built solutions on rules-engine platforms (Blaze Advisor, Corticon) for US public-sector engagements.

EDUCATION

Cornell University

2013 – 2014

Master's Degree (M.Eng.), Computer Science · GPA: 3.7

Veermata Jijabai Technological Institute (VJTI)

2008 – 2011

Bachelor of Technology, Computer Engineering · GPA: 3.9

Vivekanand Institute's Polytechnic

2005 – 2008

Diploma, Computer Science · 83.96% (cumulative) — Ranked 1st in college (final year) and 3rd in Maharashtra state

HONORS & AWARDS

- Spot Award for individual performance on a client-based financial services project — Deloitte (2012).
- Medal of Recognition — Deloitte, for volunteering with Teach For India (TFI) (2012–2013).
- Ratan Tata National Scholarship (2009) and J.R.D. Tata National Scholarship (2010–2011).
- 3rd in Maharashtra state and 1st in college — Final-year Diploma, Computer Technology (2008).
